Summary

Engineering graduate with 1 year of experience in data engineering, building production-grade ELT pipelines, Snowflake data platforms, and AI-driven analytics. Proficient in Python, SQL, Azure, and Snowflake with expertise in data modeling, machine learning, agentic AI, statistical analysis, and data visualization.

Work Experience

Data Engineer Intern — Vontier :

July 2025 – Present

- Built automated ELT pipelines using Azure Functions and Blob Storage for data ingestion.
- Designed Snowflake Medallion Architecture (Bronze/Silver/Gold) for data transformation.
- Built Streamlit dashboards with Snowflake for data visualization and stakeholder reporting.
- Developed agentic AI solutions using Snowflake Cortex with semantic models for NL querying.

PipelineStudio – AI-Assisted Data Pipeline Builder and Monitoring : (GitHub Repository) March 2026

Ideated and built an internal developer tool to automate end-to-end API-to-Snowflake data pipelines, covering Azure Function code generation, Snowflake DDL creation, live testing in the web app and also production monitoring via an interactive dashboard in Streamlit

- Built AI-powered Node.js engine for Azure Function generation, Snowflake SQL, and testing.
- Designed workflow studio with live testing and visual orchestration, reducing setup to minutes.

Technical Skills

Programming Languages: Python, SQL, JavaScript, PowerShell

Data Engineering & Analytics: ELT Pipelines, Medallion Architecture, Data Modeling, Statistical Analysis, Data Visualization, REST APIs, Workflow Automation

Cloud & Databases: Snowflake, Azure Functions, Azure Blob Storage, Supabase, Firestore

Frameworks & Tools: PySpark, Streamlit, Power BI, Node.js, React.js, React Native, Jupyter Notebooks, Git/GitHub

AI/ML: Scikit-learn, PyTorch, LangChain, Snowflake Cortex AI

Projects

Pi-Net – AI-Powered Cybersecurity Threat Scanner : ([GitHub Repository](#))

May 2025

Built a security platform and browser extension leveraging AI and threat intelligence to detect cyber threats.

- Engineered threat analysis engine using **Google Gemini**, **VirusTotal**, and **Node.js** for automated risk scoring, real-time threat detection, and comprehensive security reporting.
- Built secure reporting and auth workflows with **Supabase** for live analytics and monitoring.

AutoExpert – AI-Driven Automotive Diagnostic Platform : ([GitHub Repository](#))

Feb 2025

Built an AI-powered diagnostic app.

-
-

AI Grow – Smart Farming Assistant : ([GitHub Repository](#))

Nov 2024

Built an AI-powered React Native app for ML-driven plant recommendations based on soil and climate data.

- Integrated Firebase auth and cloud storage for secure data management and cross-device access.
- Implemented real-time plant disease detection using PyTorch and computer vision.

Publications & Achievements

Research Paper [Co-Authored]: “AI-Driven Diagnostic System for Vehicles” (Scopus Indexed) – Sep 2024

Patent [Co-Authored] (ID: 202441060562): “Aluminium Surface-Based 360° LED Strip Design” – Aug 2024

Winner – Cybersecurity Track, Hackathena (JEC Thrissur) | **1st Place** – Intra-College Hackathon, NHCE

2nd Place – College-Level Ideathon, NHCE | **State-Level** – Top 3% among 1000+ at Ideathon, CIT (Tumkur)

Top 10 among 150+ teams at a National-Level Hackathon, Graphic Era University (Dehradun)

Education

B.E. Computer Science & Engineering (Data Science)

2022 - 2026

New Horizon College of Engineering, Bengaluru | CGPA : **9.25** | Pre-University (PCMB) - **92.6%** | SSLC: **95.2%**
